Construction management and inspection IDIQ services

Role

Prime consultant

Project Description and Scope

Alta Vista Solutions (Alta Vista) provides construction management and inspection support services on an indefinite delivery-indefinite quantity basis to support the Central Federal Lands Highway Division (CFLHD) in the construction of proposed federal transportation facilities throughout the 14 states that comprise the CFL region.

Over the past two years, Alta Vista has provided experienced and fully trained construction personnel in support of 45 task orders with construction projects in 10 different states. The personnel provided include project engineers, construction inspectors, clerical support, office engineers, laboratory managers, and claims support. Most construction projects are located in or near national parks, and the type of work includes roadway rehabilitation, new roadway construction, bike path construction, gabion basket rock walls, cast-in-place concrete bridges, concrete curb and gutter, drainage culvert installation, and erosion control.

CFLHD current task orders

- Grading, asphalt resurfacing and bridge construction, Beckwourth, Genesee Road CA-70, Plumas National Forest, Plumas County, CA
- Contract closeout support, Lakewood, CO
- Subgrade stabilization and roadway rehabilitation, Deerlodge Road Project, Dinosaur National Park, CO
- Roadway rehabilitation and drainage improvement, Navajo Lake Road, Dixie National Forest, Duck Creek, UT
- Las Vegas Wash Drop Structure 4, Las Vegas, NV
- Emergency road repair due to flash flood, Atwater, TX

On the contract closeout task order, Alta Vista provided two office engineers to assist with contract administration. Their responsibilities included reviewing construction contract records, reconciling project financial accounts, documenting observations and findings, proposing recommended resolution activities, resolving deficiencies, documenting and communicating status, preparing contract closure documents, performing quality control reviews, and meeting data reporting and data entry needs.
